On December 18th took place the Awarding Ceremony of Tractor of the Year 2021. The digital event was in live streaming on totydigital.com; tractoroftheyear.com and on the main social media.

This year 18 tractors have been competing for the
4 TotY's awards.

4 tractors competing for Best of Specialized 2021

5 tractors competing for Best Utility 2021

9 tractors competing for Tractor of the Year 2021

All the 18 finalists were also in competition for
Sustainable TOTY 2021

During the digital event were assigned the following awards

MASSEY FERGUSON

8S.265

After a long and depth analysis of all the technical Parameters, the jury has elected Massey Ferguson 8S.265 as Tractor of the Year 2021

This is a full new tractor, new style, new and innovative transmission, new cooling system, new hydraulic system, new and silent cab. Last but not least a full new package of technology.

VALTRA

G 135 Versu

The jury had to evaluate the full package of technical Parameters, considering also that utility tractors must be easy to maneuver and versatile.

Based on these elements and thanks to attention to all the details, to the versatility, the technology offered on board, the very efficient hydraulic assistant and many other features.

Valtra G 135 Versu has been elected Best Utility 2021

FENDT

211 V Vario

The jury has elected Fendt V Vario 211 Best of Specialized 2021.

With a full new cab, has improved the working environment for the driver. The Dynamic Performance extends power range, the extra power (10 hp) is controlled and released automatically according to the working needs. High quality reliable tractor with a very efficient transmission.

Axion 960 Cemos

The winner of Sustainable TOTY has been chosen among all the finalists tractors of all the Toty's categories. With Claas 960 Axion, thanks to Cemos system, a big step towards a more sustainable farming has been done. All the technology available on this tractor is easy to use as never before. The optimization of all the technology all the electronics, last but not least the optimization of tires pressure, allows to this tractor a remarkable fuel saving and a much more efficient performance on field and in any working condition.
